

TRAINING WORKSHOPS

The training workshops for Digitalized Creativity Boost Training for Migrants took place in 5 countries, Cyprus, Slovakia, Poland, Spain and Italy in their host communities on February, 2023.

The pilot workshops, were organised with at least 20 migrants per country. Participants engaged in a variety of sessions and activities that amounted to 12 hours of face-to-face interaction and used Open Educational Resources (OER) for accessing the e-learning material. The Online Linguistic Support (OLS) presented to the participants, encouraged them to explore further the utilisation of platforms which offered free online language courses.

- The In Service Training Program on using Art is an inclusive Educational Tool to ensure that professionals working with migrants are fully trained to harness the potential of the BRICS educational resources. The aim was the creation of a set of tools that improved adult trainers' competencies, especially in the social and cultural integration of migrants.
- The Digitalized Creativity Boost Training for Migrants was intended for use during training courses for people with a migrant background in order to support and be aware of policies, processes and practices that meet relevant international standards in the field of migrant integration. BRICS project promotes the development of a transformative educational movement within a global context.
